

# TYNE TUNNELS

We are the first tunnels management in Europe to achieve registration to EMAS (Eco-Management & Audit Scheme) and are committed to improving our environmental performance.

To help us do this we;

- Do not exceed legal limits for air quality in the vehicle tunnel.
- Recycle our waste- office paper, florescent tubes, oil etc.
- Encourage customers to reduce speed, thus reducing fuel consumption.
- Improve our landscape with the introduction of a more diverse habitat.
- Work closely with schools to raise awareness of our operations.
- Welcome visitors and give information on tunnels operations.
- Purchase the most environmentally friendly products and equipment where possible.
